

The YMCA organization has locations across the country. Many employees at YMCA work several different positions at varying rates of pay. To report back to funding sources and track positions to budgets and the General Ledger, it is a "Best Practice" to implement ResNav's unique YMCA Solution. ResNav has worked with many YMCA organizations since 2003 to deliver a YMCA Database which includes our Position Control system, Budget Planning/Monitoring, and provides standard reports that are integrated with ADP's Time

and Attendance and Payroll system. Our clients receive a simple Data Entry front-end customized for the YMCA organization. All primary position detail is stored in ADP and our solution extracts Master file data from ADP and sends position data to ADP. Thus, the ADP Time and Attendance system will only show the employees their specific time tracking options, ensuring that costs are properly applied. Our solution has a simple pay-as-you-go pricing and modest one-time implementation fee.

Software Features

Accurate Budgeting and Forecasting

Easily Report Back to Funding Sources

Simple Pay-as-you-go Pricing

Integrated with ADP Time and Attendance and Payroll

Track and Tie Employees to Positions

Ensure Accurate Time Tracking
